KHUSHI SHARMA

+91-9899614552 · khushiirsharma@gmail.com
Gurugram, India · LinkedIn · Github

AI/ML-focused Computer Science student with hands-on production experience building LangGraph agentic workflows and multi-step LLM pipelines in a real BPO environment. Passionate about designing intelligent, autonomous systems that reduce manual intervention and improve operational efficiency.

EDUCATION

The NorthCap University | *B.Tech — CSE (AI/ML)* 2023 – 2027 · Gurugram
CGPA: 9.34 · Awarded College Scholarship for academic excellence

Summer Fields School | *12th — PCM* 2022 – 2023 · Gurugram
Percentage: 94%

WORK EXPERIENCE

Hitachi | *Cloud Department* June 2026 – Present · Gurugram

- Conducting systematic benchmarking of Vision Language Models (VLMs) — Qwen2.5-VL, Gemma, Phi, and SmolVLM — on real-world invoice and government document extraction tasks.
- Evaluating model performance across accuracy, latency, and structured output quality to identify optimal VLM for production document processing pipelines.

RMT Engineering | *AI/ML Intern* Jun 2025 – Jul 2025 · Gurugram

- Built and enhanced an AI-driven Quality Management System (QMS) for BPO call analysis, integrating LLM pipelines to automate supervisor-level evaluation workflows.
- Designed multi-node LangGraph agentic workflows to automate supervisor decision-making in BPO environments, reducing dependence on manual call review processes.
- Engineered multi-step LLM task orchestration pipelines using OpenAI APIs and Python, improving system response efficiency and enabling autonomous decision routing.
- Integrated agentic AI capabilities into production systems, contributing to measurable improvements in processing speed and system responsiveness.

PROJECTS

AI Document Intelligence Platform —LangGraph · RAG · ChromaDB · OCR · FastAPI · React

Designed and built an enterprise-grade AI knowledge management system — ingests multi-format documents (PDFs, scanned images), auto-classifies by urgency, generates summaries, and enables semantic search via a RAG retrieval pipeline. Implemented role-based information access, policy compliance checking, and a conversational dashboard for instant insight retrieval.

AI Legal Document Analyzer — LangGraph · *Groq API · PyMuPDF · Streamlit · HF Spaces*

Built an end-to-end agentic system that ingests legal documents (offer letters, rent agreements, T&C), generates plain-English summaries, flags risky clauses with risk severity scores, and answers follow-up questions via conversational Q&A. Deployed on Hugging Face Spaces

Azure Multilingual Customer Feedback Analyzer — Azure AI Language · Flask · Chart.js · Azure App Service

Built a multilingual customer feedback analysis platform using Azure AI Language services performs sentiment analysis, key phrase extraction, and language detection across feedback in multiple languages. Developed an interactive Flask dashboard with Chart.js visualizations for real-time insight monitoring. Deployed on Azure App Service.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, JavaScript
Web & Backend: Node.js, Express.js, MySQL
AI & GenAI: LangGraph, LLM Integration (OpenAI, Mistral), Prompt Engineering, RAG, ML
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook

CERTIFICATIONS

AWS Academy Graduate — Cloud Foundations · Amazon Web Services, 2023
Web Development Bootcamp — by Angela Yu, 2024

ACHIEVEMENTS & ACTIVITIES

- Awarded College Scholarship for academic excellence — NorthCap University, 2023.
- Content Member, Prayaas & Yukti Clubs; Content Head, Hood Club —The NorthCap University.
